Cargo Terminals

Alwaysse Engineering are the World's leading manufacturer of Ball Transfer Units designed specifically for air cargo and baggage handling systems. The robust construction of the 805/807 units allows them to work in the most severe working conditions. With load capacities from 250kgs to 600kgs per ball unit you can be sure your departure gates are always open for business. We offer free technical advice based on over 60 years experience of the air cargo/baggage handling systems. Why not give us a call?
